INTRODUCTION

New features

We're excited to announce that tracking analysis is now available in Fathom!

These new features help you to dig deeper into the performance of different areas of your business. This latest release offers everything you need to gain insights into the performance of your classes, departments, locations, cost centres, profit centres...

Or any other class data sourced from QuickBooks.

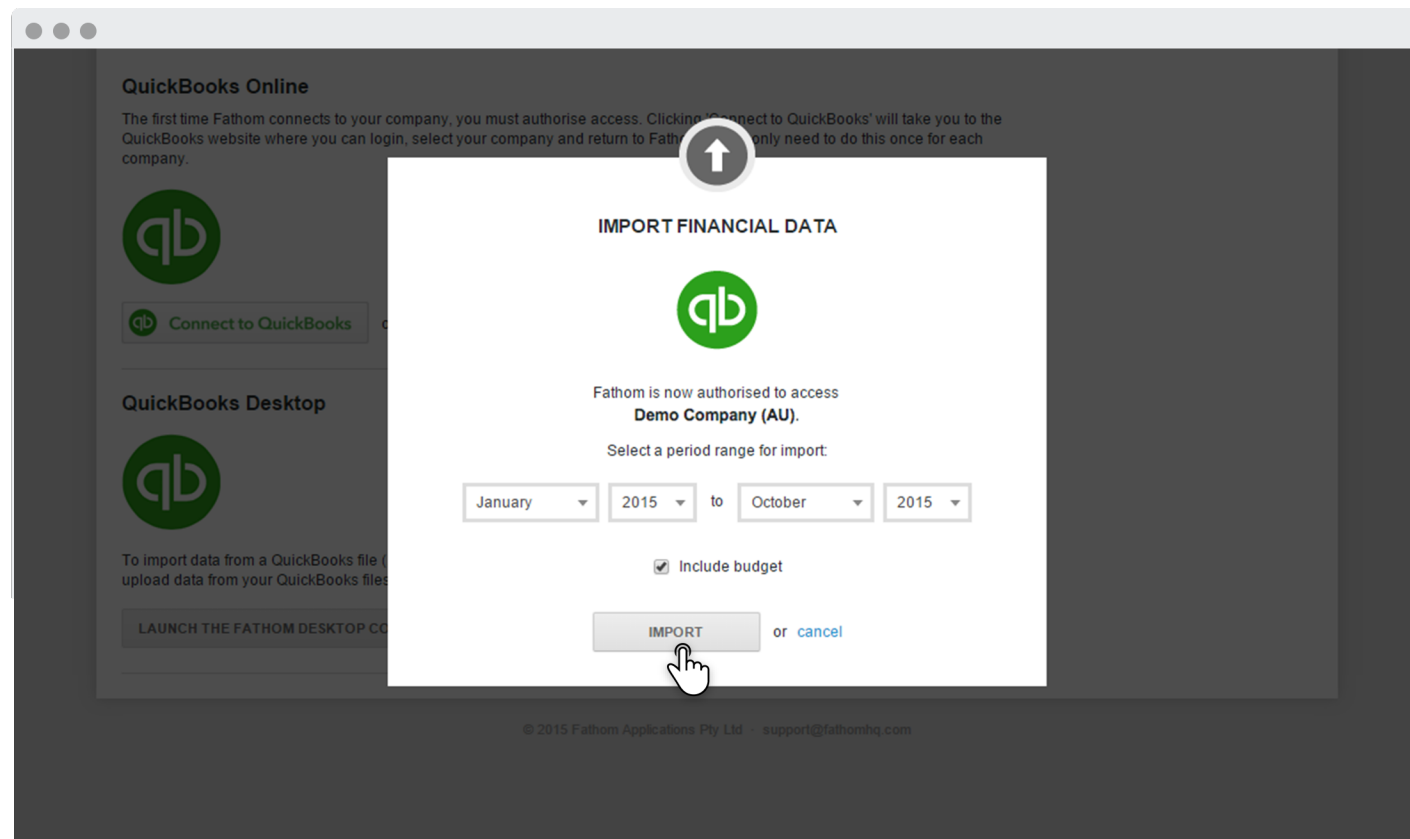

GETTING STARTED

Importing from QuickBooks

When importing from QuickBooks into Fathom, you can now choose to also import data for selected classes and locations. First select the period range for import, then click '**Import**'.

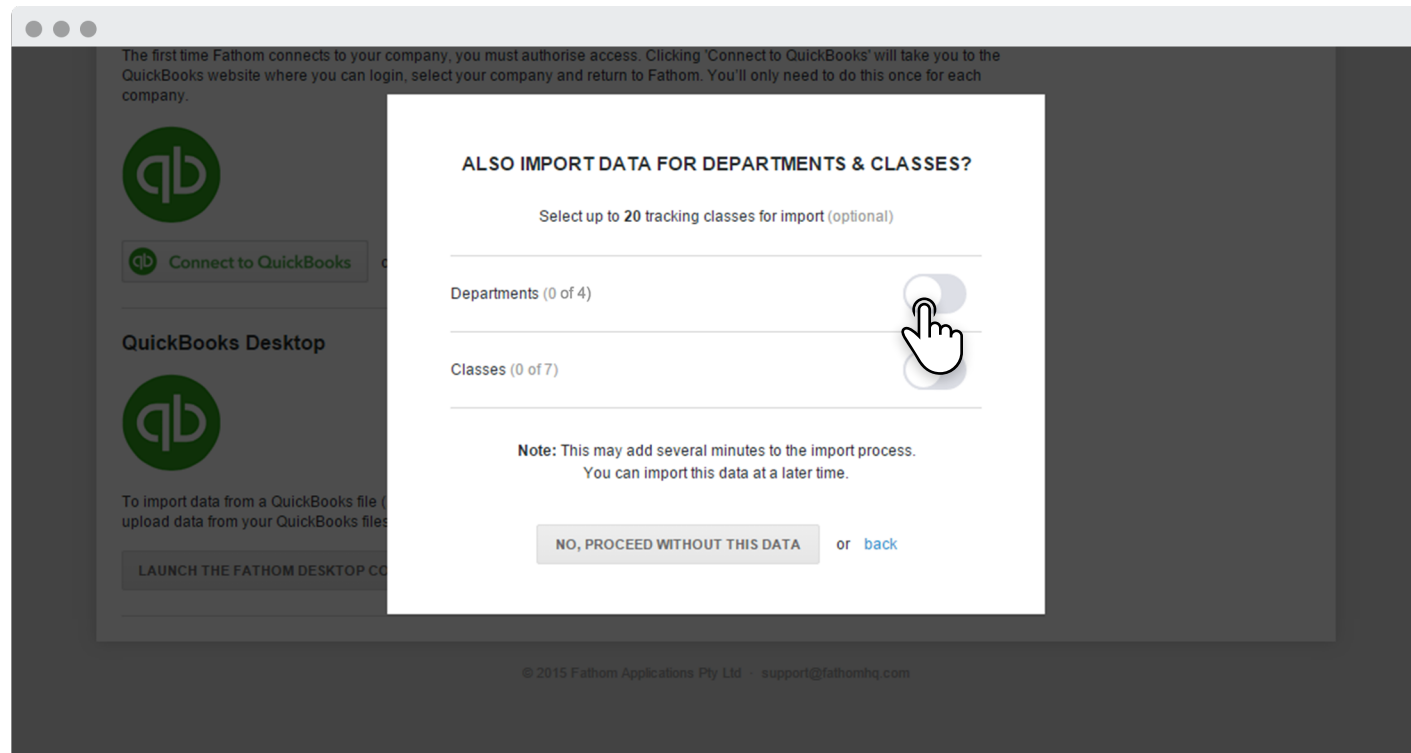

GETTING STARTED

Selecting class and location data

Then choose which classes or locations you wish to import for analysis.

Classes and locations are typically setup in QuickBooks to help to track different segments within a business (ie. divisions, departments, business units, cost centres etc..)

IMPORTING

Selecting class options

Then select which class and location options you wish to include in your analysis and reports. You can import a **maximum of 20** class options per company.

Simply select the 'green' tick (✓) to include the option in the import.

SELECT DEPARTMENTS FOR IMPORT (MAX 20)

[select all](#) [unselect all](#)

<input checked="" type="checkbox"/>	Sales
<input checked="" type="checkbox"/>	Production
<input checked="" type="checkbox"/>	Marketing
<input checked="" type="checkbox"/>	Research and Development

IMPORTING

Confirm selection

Click on '**Confirm selection**' to start the import process. The import of data for each class or location option may take up to 1 minute - depending on the number of monthly periods to be imported.

The screenshot shows the Fathom QuickBooks Online interface. On the left, there are sections for 'QuickBooks Online' and 'QuickBooks Desktop'. The 'QuickBooks Online' section includes a 'Connect to QuickBooks' button. The 'QuickBooks Desktop' section includes a 'LAUNCH THE FATHOM DESKTOP C' button. A modal dialog box is open in the center, titled 'ALSO IMPORT DATA FOR DEPARTMENTS & LOCATIONS?'. It asks the user to 'Select up to 20 tracking classes for import (optional)'. There are two rows: 'Departments (4 of 4)' with an 'edit' link and a green toggle switch, and 'Locations (0 of 7)' with a grey toggle switch. A note at the bottom states: 'Note: This may add several minutes to the import process. You can import this data at a later time.' At the bottom of the dialog, there are two buttons: 'IMPORTING...' and 'or back'. A hand cursor is pointing at the 'IMPORTING...' button. The footer of the interface shows '© 2015 Fathom Applications Pty Ltd - support@fathomhq.com'.

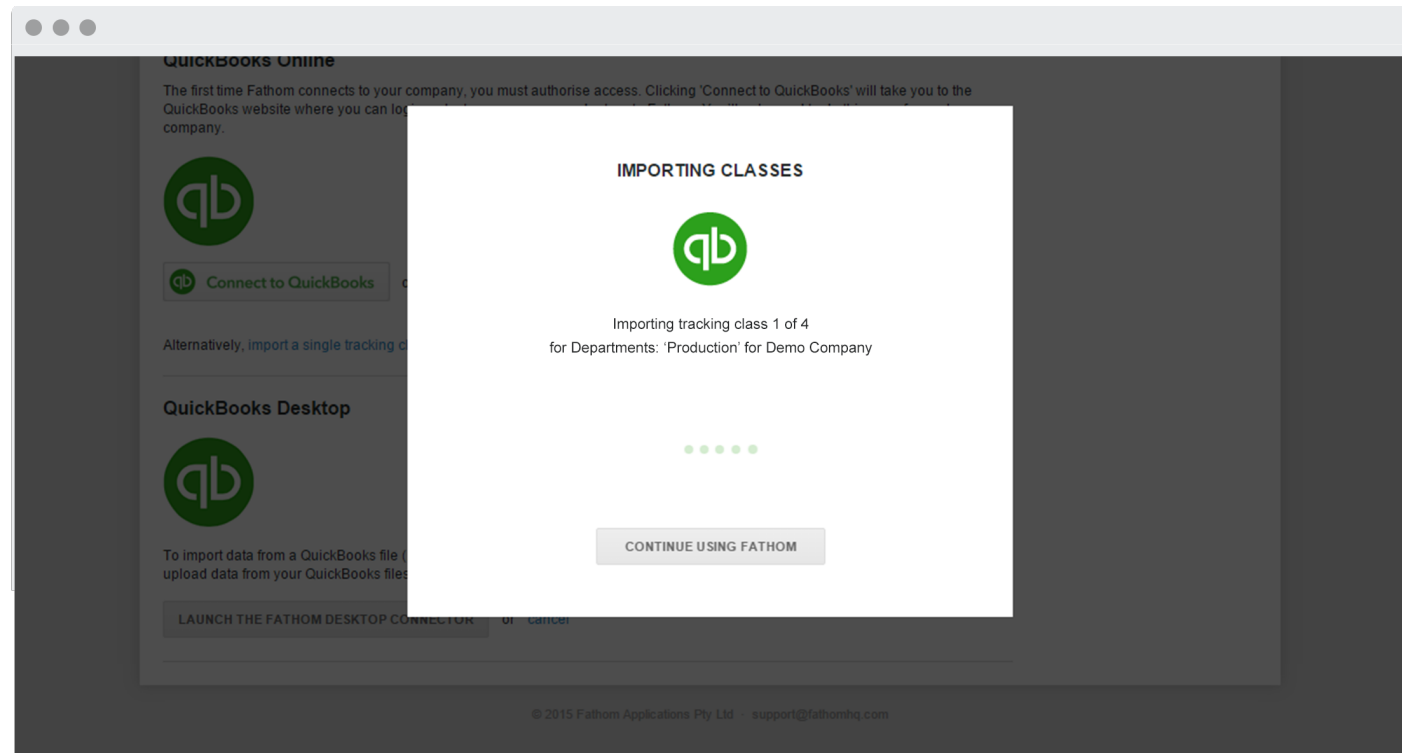

IMPORTING

Importing

While the import is occurring, you can continue using Fathom. Click '**Continue using Fathom**' to proceed. A notification will appear to let you know when the import is complete.

After the import is complete, you may access the setup, analysis and reports for this company.

IMPORTING

Updating results

To update the financial results for a company and associated results for each class option, you can choose for Fathom to **automatically update** from QuickBooks.

This ensures that the results in Fathom will keep in sync with the results in QuickBooks.

To select this option, go to '**Step 1**' of the company setup.

1 Update Data 2 Company Profile 3 Tag Financials 4 Select KPIs 5 Set Targets 6 Set Alerts View Analysis

Step 1: Import or update your financial and non-financial data.

Financials

✓ Your QuickBooks company will now be updated automatically on a daily basis

Date Range: January 2015 - October 2015 [remove periods](#)

Source: QuickBooks [disconnect](#)

Tracking: Classes (4 imported) [edit](#)

Last Updated: 1 minute ago (27th November 2015 4:55pm)

[UPDATE FROM QUICKBOOKS ONLINE](#)

☒ Automatically update every day

Update will occur before 8am (E. Australia Standard Time).
Financial results will be updated to the end of the most recently completed calendar month.

Budgets

Date Range: January 2015 - December 2015

IMPORTING

Importing class and location data for an existing company

If you have previously imported a company from QuickBooks into Fathom, it's possible to subsequently import data for classes. To do this go to '**Step 1**' of the company setup > then in the '**Classes**' section click on '**Edit**' to select which classes, departments or locations you wish to include in your analysis.

CREATING CUSTOM KPIS

Creating a Custom KPI

You can easily create custom KPIs to track the performance of your divisions, departments or regions. Go to '**Step 4**' of the company setup, then select '**Create a KPI**'.

CREATE A KPI FOR A DIVISION

	Type	Importance	
A Profitability			
✓ Total Revenue ?	Default	★★★★★	Critical
✓ Gross Profit Margin (%) ?	Default	★★★☆☆	Medium
✓ Operating Profit Margin (%) ?	Default	★★★★☆	High
✓ Expense-to-Revenue Ratio ?	Default	★★★★★	Critical
✓ Breakeven Margin of Safety ?	Default	★★☆☆☆	Low
B Activity			
✓ Activity Ratio ?	Default	★★★★★	Critical
✓ Accounts Receivable Days ?	Default	★★☆☆☆	Low

CREATING CUSTOM KPIS

Creating a KPI for a division

Using the KPI formula builder, you can create your own custom KPIs, For example:

Gross Profit % of Division A =

$$\left(\frac{\text{Gross Profit}_{\text{Division A}}}{\text{Total Revenue}_{\text{Division A}}} \right) \times 100$$

[Clear](#)

Select a variable to include in the formula:

☒ Use current period

☐ Use prior period

All

☒ Profit & Loss

☐ Balance Sheet

☐ Non-Financials

☐ Other

A

☐ Abnormal Income (\$)

☐ Adjustments (\$) *

☐ Adjustments (\$)

C

☐ Cash Tax Paid (\$)

☐ COS Goods (\$) *

D

☐ Depreciation (\$)

☐ Agents Commissions (\$) *

☐ Amortisation (\$) *

☐ COS Other (\$) *

☐ Cost of Sales (\$)

☐ Depreciation & Amortisation (\$) *

CREATING CUSTOM KPIS

Creating a KPI for multiple divisions

You can also create a custom KPI which tracks the performance of multiple classes, departments, locations, etc... For example:

Revenue from Division A + Division B, as a % of Total Revenue

$$\left(\left(\text{Revenue}_{\text{Division A}} + \text{Revenue}_{\text{Division B}} \right) / \text{Total Revenue} \right) \times 100$$

[Clear](#)

Select a variable to include in the formula:

☒ Use current period

☐ Use prior period

All

☒ Profit & Loss

☐ Balance Sheet

☐ Non-Financials

☐ Other

A

- ☐ Abnormal Income (\$)
- ☐ Adjustments (\$) *
- ☐ Adjustments (\$)

C

- ☐ Cash Tax Paid (\$)
- ☐ COS Goods (\$) *

D

- ☐ Depreciation (\$)

- ☐ Agents Commissions (\$) *
- ☐ Amortisation (\$) *

- ☐ COS Other (\$) *
- ☐ Cost of Sales (\$)

- ☐ Depreciation & Amortisation (\$) *

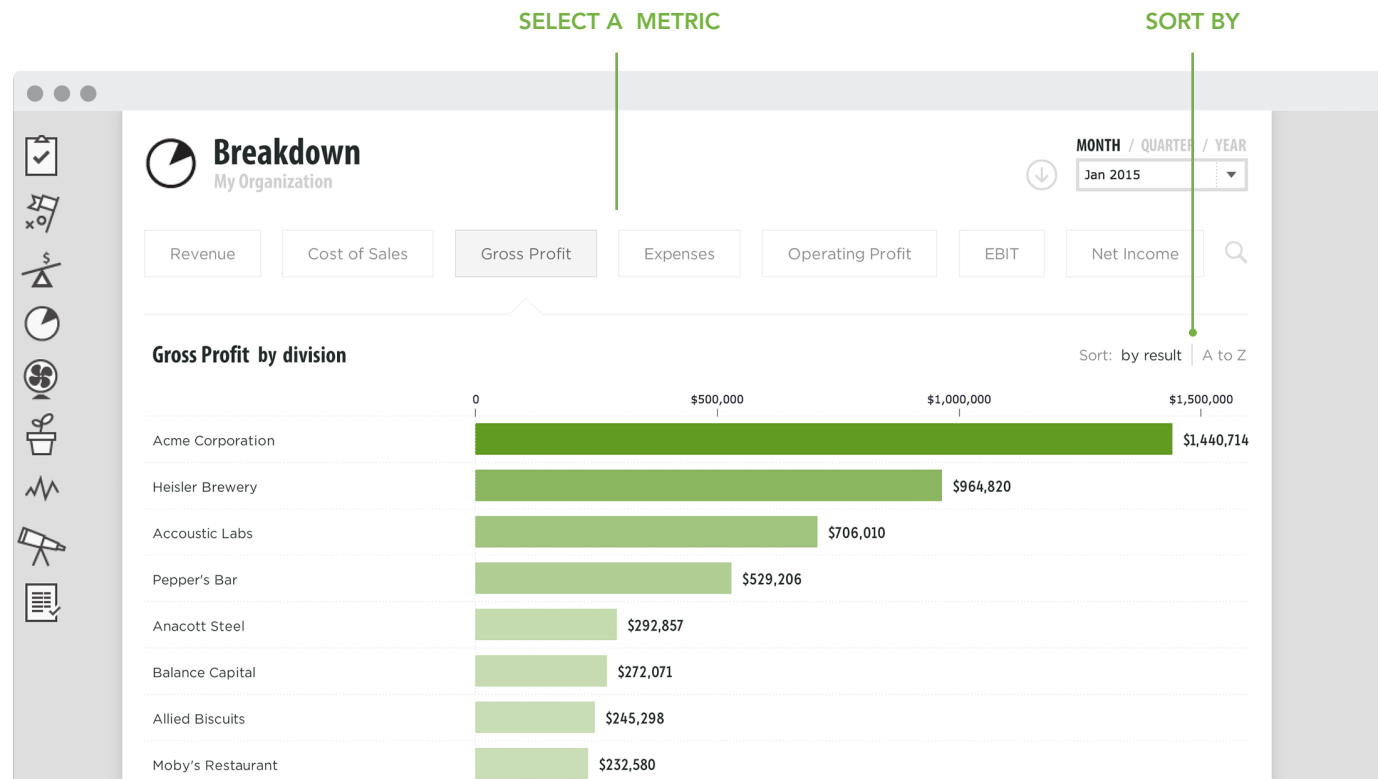

ANALYSIS

Breakdown analysis

The breakdown analysis tool makes it easy to view profitability breakdowns.

It helps to rank the **profitability** of each business unit. Using the menu at the top of the analysis tool, you can quickly select from a range of profitability margins. And then sort results, from best performer to worst performer, or sort by alphabetical order.

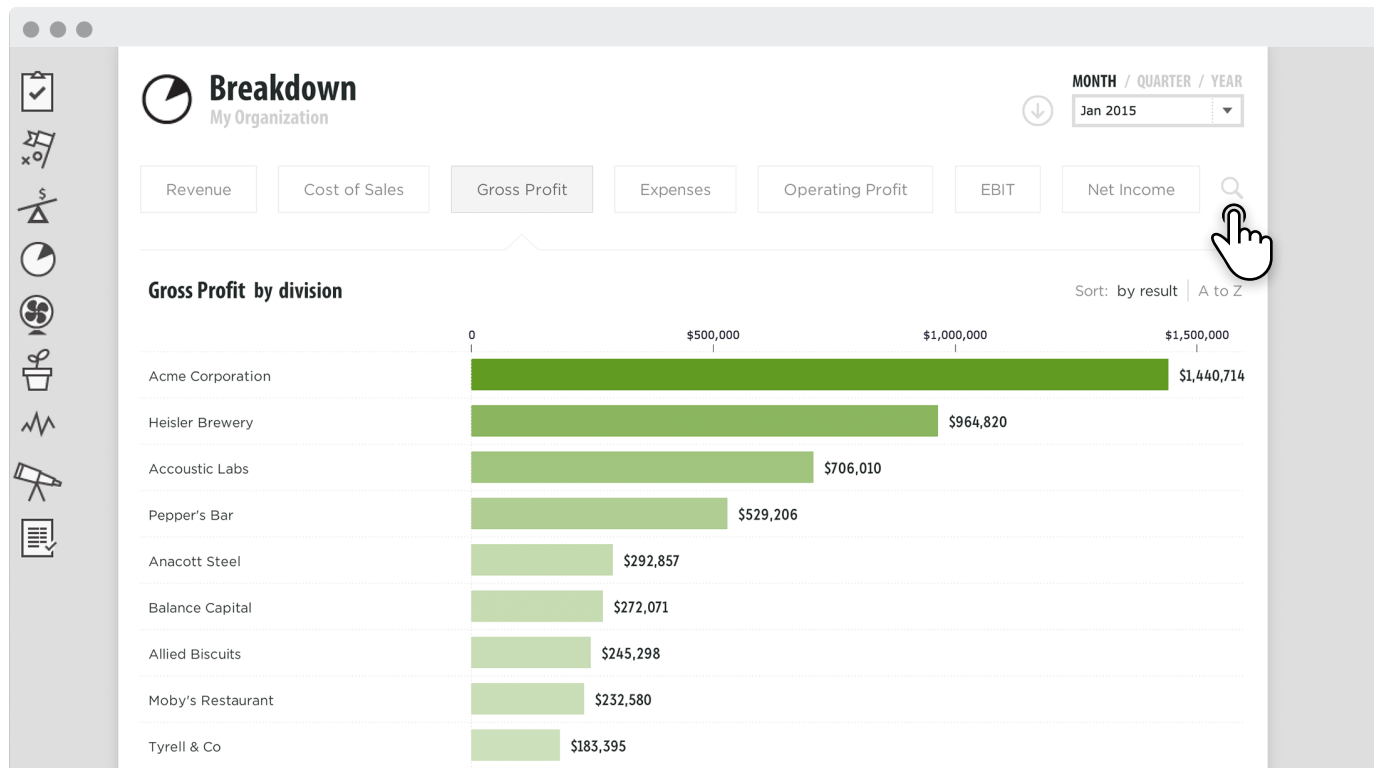

ANALYSIS

Breakdown analysis for any metric

In addition to the profitability metrics, you can view a breakdown analysis for any other metric. To do this select the magnifying glass (🔍)

Note: any amounts not classified to a class or location option, are shown as 'unclassified'.

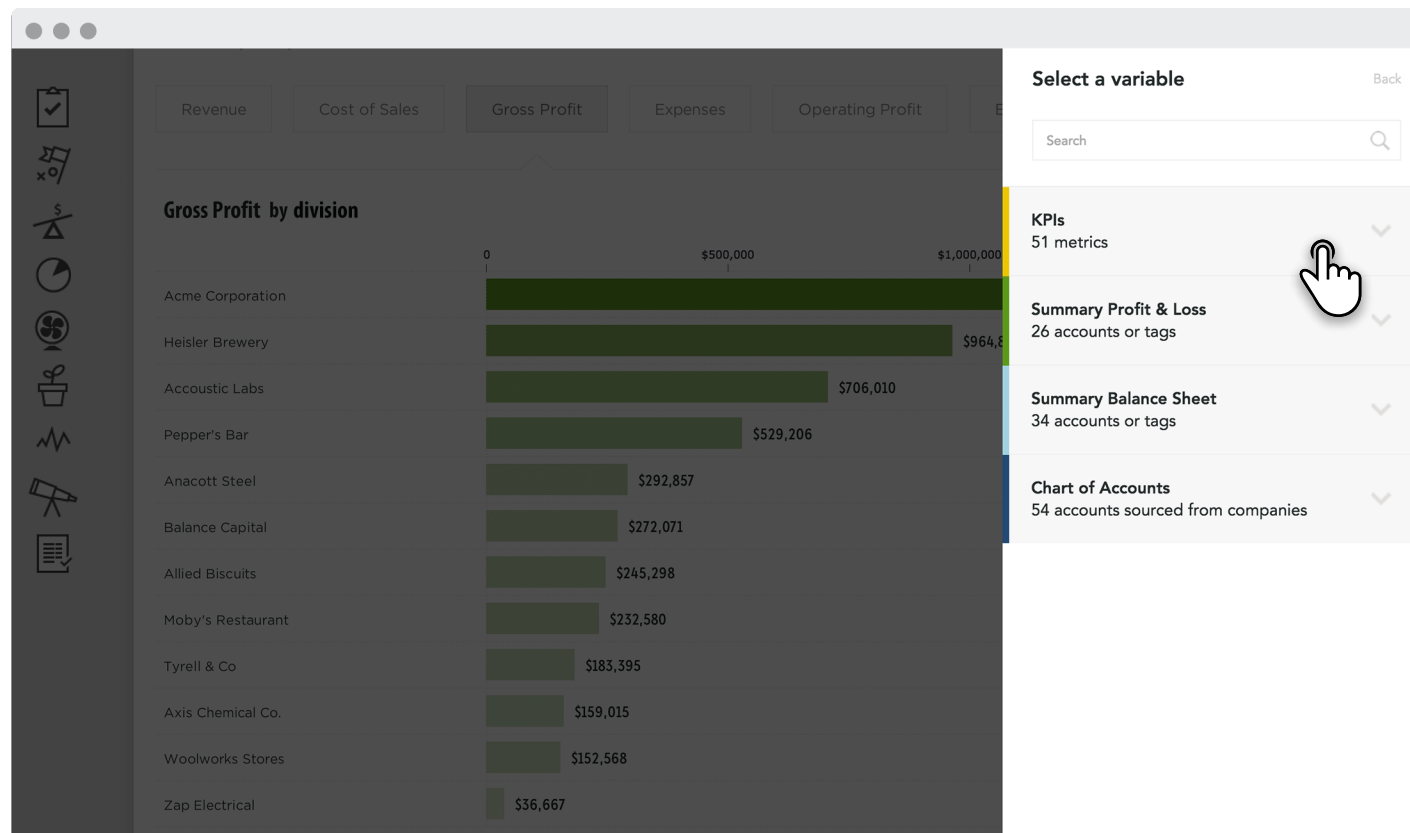

BREAKDOWN ANALYSIS

Select a metric

Then from the side panel, select any specific revenue account, expense account, financial KPI or custom KPI. You can also search for a metric or account.

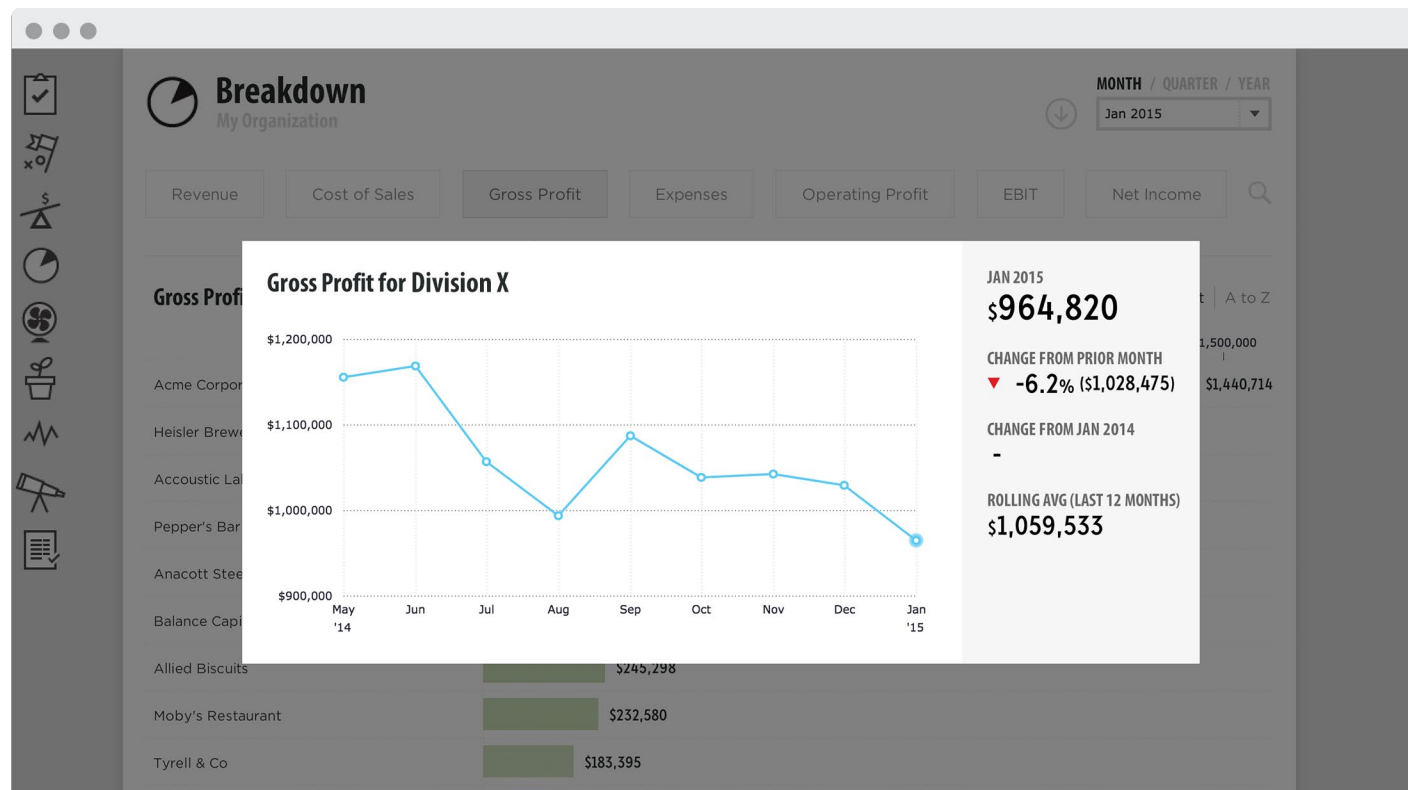

BREAKDOWN ANALYSIS

Breakdown drilldown

To see additional details about the results for a specific class or location option, click on a row in the breakdown analysis to view more details and a trend of results.

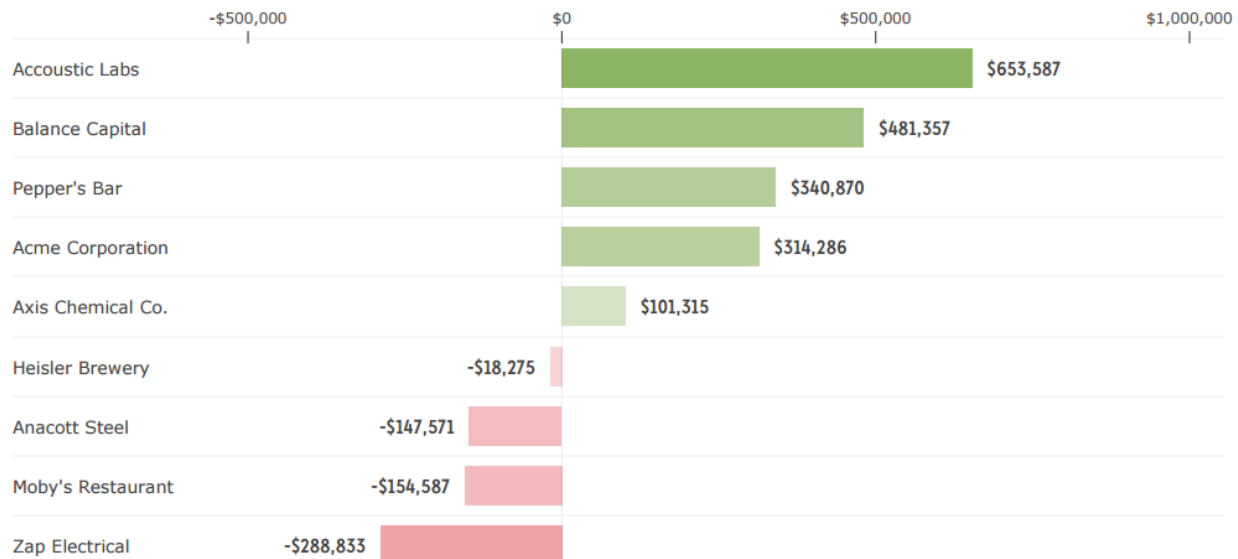

REPORTING

Breakdown report

Click on the download a report icon (⬇) to create a PDF report of the current view.

Breakdown Analysis

EBIT by company

REPORTING

Excel reports

You can also create Excel reports which show **side-by-side financial statements** for each division, department, location or business unit. To do this go to 'Reports'.

25	Insurance	433	0	0	0	
26	Legal expenses	441	0	0	0	

CONSOLIDATING DIVISIONS

Overview

Fathom enables you to consolidate class and location data from separate QuickBooks organisations. For example, if a business operates in 3 locations and each location is comprised of 2 divisions.

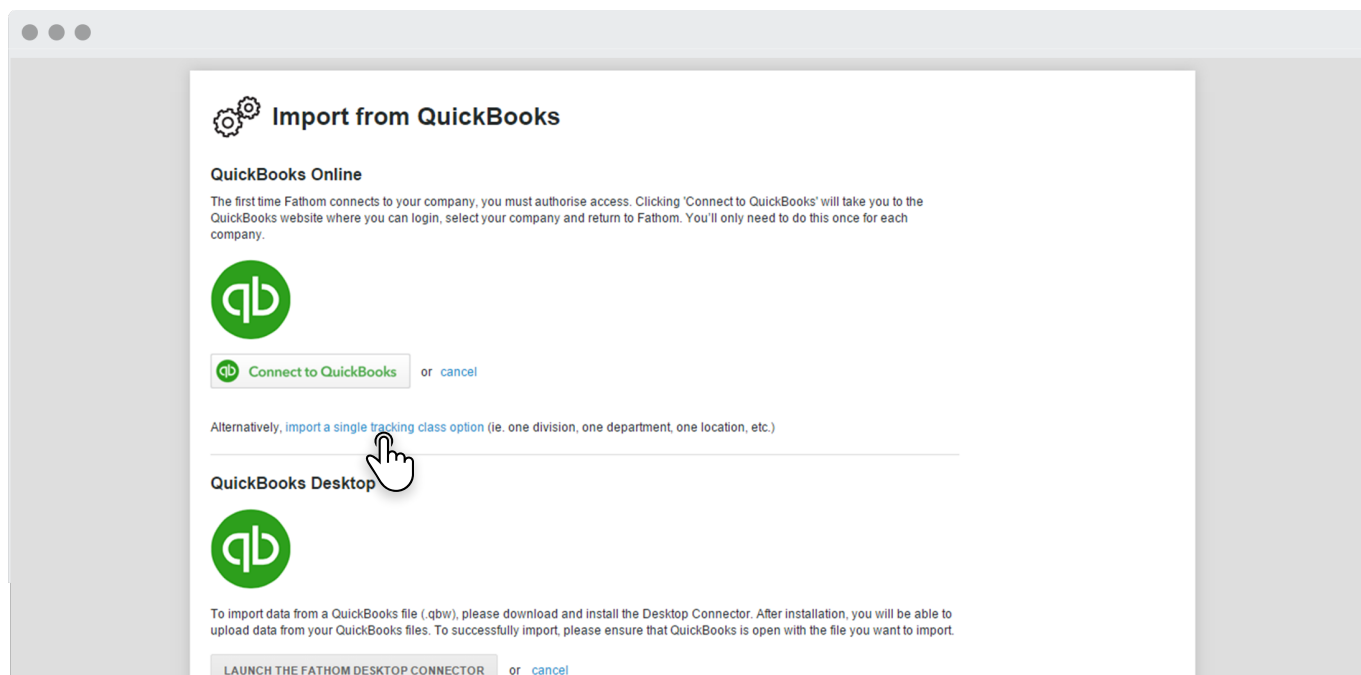

CONSOLIDATING DIVISIONS

Consolidating Divisions

To consolidate or compare different divisions, first import a single class or location option as a separate entity in Fathom.

Go to '**Add a company / group**', select '**QuickBooks**' as your source, then select to '**import a single tracking class option**'. Rather than importing a company and all selected divisions, only data for the selected class will be imported.

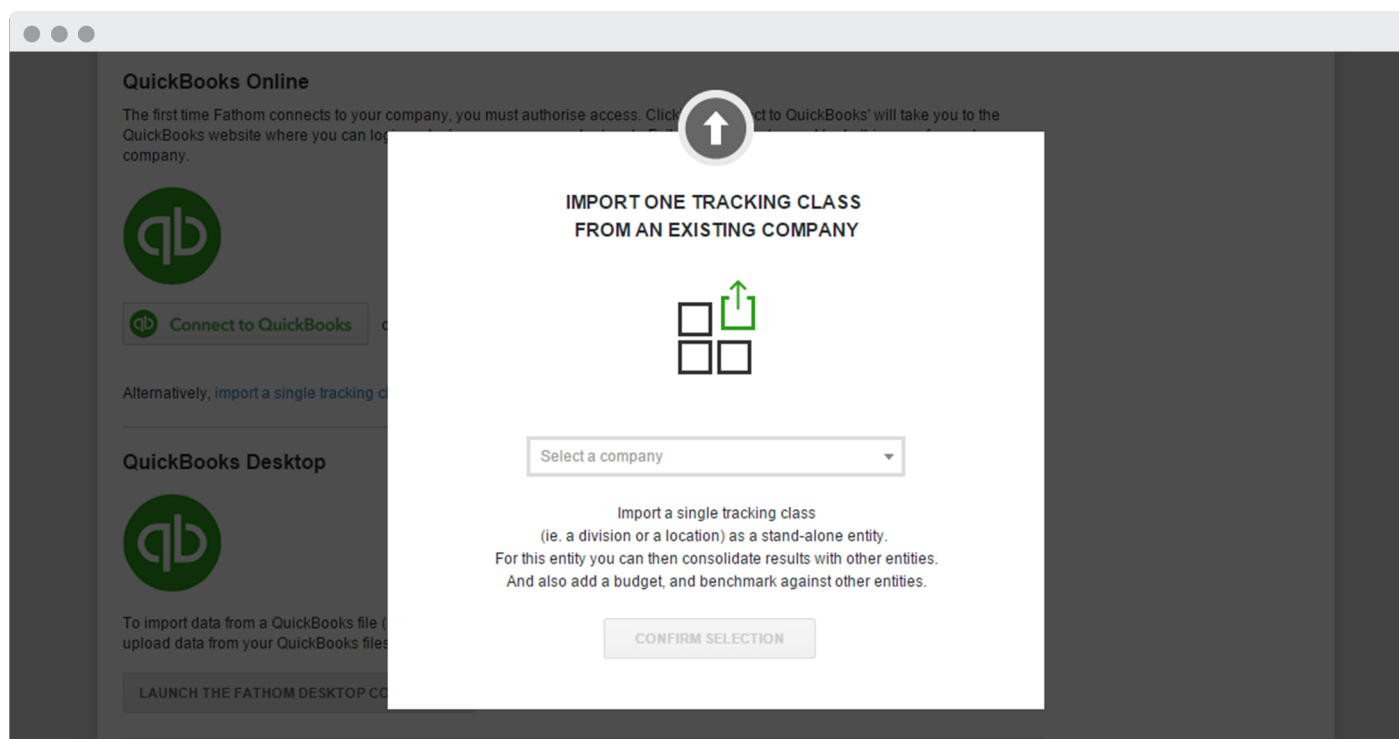

CONSOLIDATING DIVISIONS

Importing a division as a separate entity

You can only import a single class option for any company which you have previously imported into Fathom. Select the company > then **select one class** from that company. Click **"Import"** to commence the import of data for this class.

CONSOLIDATING DIVISIONS

Creating a consolidated group

After importing each division as a separate entity, you can group divisions into a consolidated group. To do this go to **'Add a company / group'**, then select **'Group'**.

The screenshot shows a web application window titled "Create a Consolidated Group". It includes a sub-header with a small organizational chart icon. Below the title, it says "Follow these steps to create a group for consolidated reporting:". There is a text input field for "Group Name" containing the text "My Group". Below this, it says "Select the companies that belong to this group:". There are two main panels. The left panel has a search bar labeled "filter companies" and an "Add All" link. It contains a list of divisions: Division 3, Division 4, Division 5, Division 6, and Division 7. Each division has a green plus icon to its right. The right panel has a "Remove All" link and contains a list with Division 1 and Division 2, each with a grey minus icon to its right.

or creating a benchmark group

Or after importing each division as a separate entity, you can also group divisions into a benchmark group. To do this, from the top menu go to **'Benchmark Settings'**, then select **'Create a new group'**.

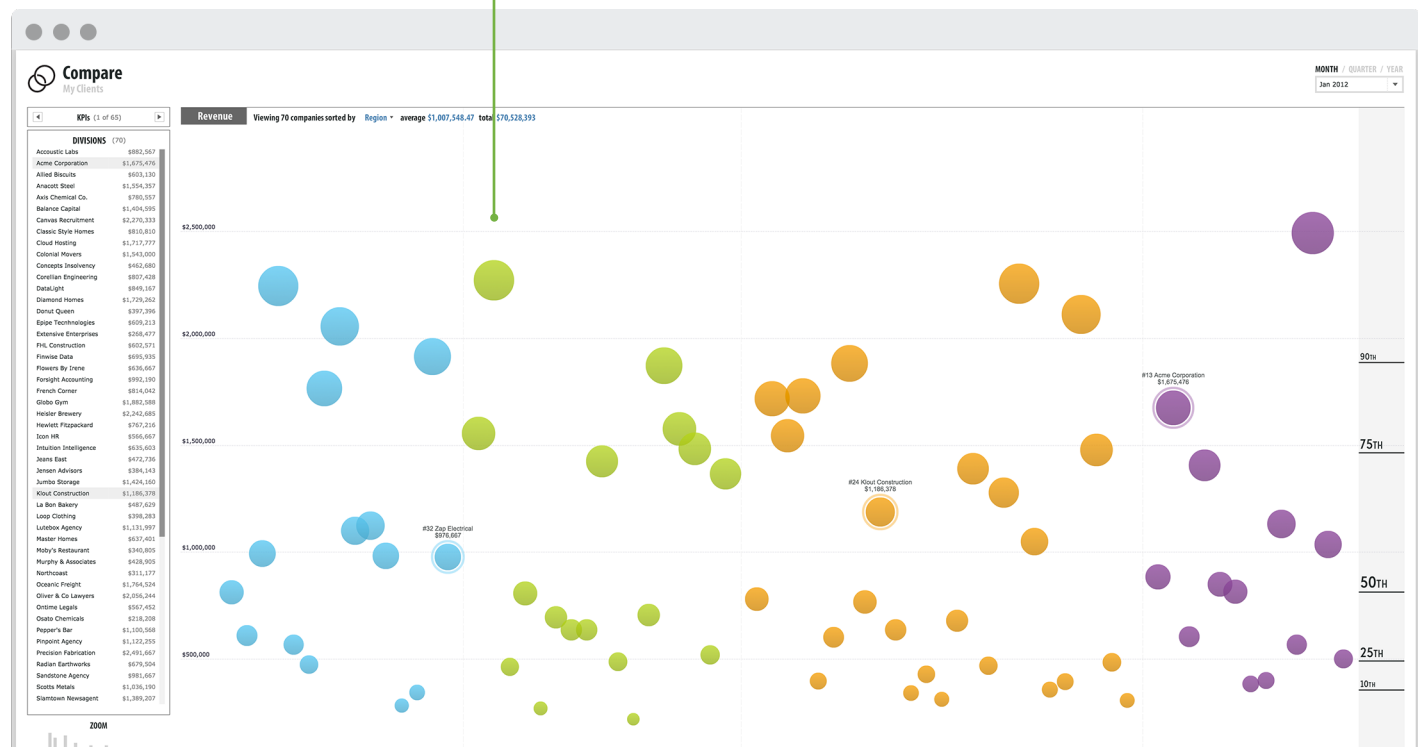

COMPARING DIVISIONS

Benchmarking divisions

Using the **Compare** tools in Fathom you can compare and rank the performance of your divisions.

EACH DOT REPRESENTS A DIVISION

APPENDIX

Terms

CLASSES

Classes in QuickBooks help to review and compare different areas of your organisation, and improve your reporting. For example if you have a car hire business operating from 7 locations and also have two business divisions, Corporate and Retail. Classes help to track sales at each location, department, and also sales in each division.

CLASS OPTIONS

These are the class options you want to track. For example, the regions in which your business operates (ie. north region, south region, east region and west region).

BREAKDOWN ANALYSIS

The breakdown analysis tool makes it easy to visually compare the performance of different areas of your organisation. It is also enables consolidated groups to compare the performance of companies which form part of that group.
